**TempuTech is the
"SMART" Choice**

The Scan Master manufactured by Gil Instruments Co. is delivered in a standard wall mount enclosure measuring 7" x 7" x 4" with a 16 character by 2 line display. The Scan Master monitors 1 to 24 Type T thermocouples and is powered by either 120 or 240 volt AC. The scan rate of the Scan Master is adjustable from 1 to 4 seconds. Temperature readings are displayed in degrees (Centigrade or Fahrenheit). The scan is selectable for automatic or manual modes. Each Alarm point can be turned on or off and the operator can program each point with alpha or numeric characters. The Scan Master features an adjustable temperature alarm from -15 to +230 F with the rate of temperature rise being adjustable from 1 to 99 degrees Fahrenheit.
